

CHOROLIN IT LTD

Enterprise Knowledge Base & Multi-Tier Job Description Corpus for RAG Models

HQ: Dhaka, Bangladesh
Contact: hr@chorolin.com
Version: 2.0 (Expanded)

1. COMPANY PROFILE & ORGANIZATIONAL ARCHITECTURE

Chorolin IT LTD is a technology consultancy and custom software house based in Dhaka, Bangladesh. We build enterprise software, scalable web services, and cloud-native AI infrastructures for global clients. This knowledge corpus establishes standard parameters for HR policies, employee benefits, and multi-tiered job role expectations.

2. WORKPLACE POLICIES & OPERATING NORMS

Policy Area	Standard Terms	Keying Details for RAG Context
Work Hours	5 days/week (Sunday – Thursday). 10:00 AM – 6:00 PM BST.	Standard full-time employment clause.
Work Model	Hybrid (3 days On-site in Dhaka, 2 days Remote). Fully remote for Staff/Principal roles.	Customizable based on seniority level.
Probation Period	6 months for Junior/Mid roles; 3 months for Senior/Principal roles.	Evaluated on technical delivery and peer review.
Leave Structure	14 Casual/Earned + 10 Sick Days + Govt Holidays + 5 Paid Study/Certification Days.	Applies across all full-time designations.
Review Cadence	Bi-annual performance and salary evaluations in June & December.	Career track progression checkpoint.

3. STANDARD ENGINEERING & PRODUCT EXPERIENCE TIERS

Use these predefined career ladders to tailor job descriptions based on seniority requirements specified in hiring requests.

Level / Tier	Years Exp.	Core Technical Responsibility	Leadership & Ownership
Junior (L1)	0 – 2 Years	Bug fixes, unit testing, features under direct supervision.	Individual contributor; focused on task execution and code quality.
Mid-Level (L2)	2 – 5 Years	End-to-end module development, API design, code reviews.	Mentors juniors, owns sub-systems, collaborates with QA and Product.
Senior (L3)	5 – 8 Years	System architecture, performance optimization, tech stack selection.	Leads feature squads, drives technical standards, unblocks engineers.
Principal / Lead (L4)	8+ Years	Cross-system design, technical roadmap, R&D, SLA resilience.	Strategic tech leadership, stakeholder management, org-wide standards.

4. EMPLOYEE COMPENSATION & BENEFITS FRAMEWORK

Financial & Monetary Perks

- **Festival Bonuses:** 2 Basic Salaries per year (Eid-ul-Fitr & Eid-ul-Adha or preferred festival).
- **Provident Fund:** 8% matching company contribution post-probation.
- **Profit Sharing:** Annual team bonus based on company performance KPIs.

Health, Growth & Equipment

- **Health Coverage:** Inpatient & Outpatient medical insurance for employee & dependents.
- **Learning Budget:** BDT 35,000/yr for certifications, books, and courses.
- **Hardware:** MacBook Pro or high-spec Linux workstation + monitor setup.

5. SOFTWARE ENGINEERING ROLE TRACK

Junior Software Engineer (Node.js / React) L1 | Engineering

Dhaka (On-site) | Full-Time | Ref: JD-SWE-L1

Role Purpose: Assist in building and maintaining web applications, writing clean code, and fixing bugs under senior guidance.

Responsibilities:

- Develop frontend UI components in React.js and backend API endpoints using Node.js/Express.
- Write comprehensive unit tests using Jest/React Testing Library.
- Participate in daily stand-ups and code reviews to adopt software engineering best practices.

Requirements: Bachelor's in CS/SE or equivalent, 0-2 yrs experience, proficiency in JavaScript/TypeScript, Git basics, SQL fundamentals.

Mid-Level Software Engineer (Full Stack) L2 | Engineering

Dhaka (Hybrid) | Full-Time | Ref: JD-SWE-L2

Role Purpose: Take ownership of feature modules from design to deployment while ensuring system responsiveness and reliability.

Responsibilities:

- Design RESTful and GraphQL microservices with Node.js/NestJS and PostgreSQL/MongoDB.
- Implement responsive, stateful web interfaces using Next.js and Tailwind CSS.
- Optimize database queries and implement Redis caching strategies for performance.

Requirements: 2-5 yrs full-stack development experience, strong OOP/FP skills, Docker containerization experience, unit/integration testing mastery.

5. SOFTWARE ENGINEERING ROLE TRACK (CONTINUED)

Senior Software Engineer (Backend / Distributed Systems)

L3 | Engineering

Dhaka (Hybrid) | Full-Time | Ref: JD-SWE-L3

Role Purpose: Drive backend architecture, scale distributed systems, and mentor junior and mid-level engineers across squads.

Key Responsibilities:

- Architect scalable cloud services handling high concurrency using Node.js/Go and PostgreSQL.
- Design event-driven architectures utilizing Kafka or RabbitMQ messaging queues.
- Lead technical code reviews, establish linting standards, and maintain CI/CD pipelines.
- Collaborate with Product Managers to break down complex business goals into tech specs.

Must-Have Qualifications: 5-8 yrs software engineering experience, mastery of distributed systems, database indexing/sharding, Docker, Kubernetes, and cloud services (AWS/GCP).

Principal Software Engineer / Technical Lead

L4 | Leadership

Dhaka / Remote | Full-Time | Ref: JD-SWE-L4

Role Purpose: Serve as the highest technical authority for company engineering teams, driving long-term technology roadmaps, system resilience, and cross-organization tech standards.

Key Responsibilities:

- Define multi-year technology vision and architectural blueprints across all enterprise products.
- Evaluate new technologies, frameworks, and AI integration strategies to maintain competitive edge.
- Partner with C-suite executives to align technical capabilities with global business targets.
- Establish organization-wide security, disaster recovery, and compliance protocols.

Must-Have Qualifications: 8+ yrs engineering experience, proven track record of architecting large-scale SaaS/enterprise systems, exceptional leadership and communication skills.

6. DEVOPS & CLOUD INFRASTRUCTURE TRACK

Junior Cloud / DevOps Engineer L1 | Infrastructure

Dhaka (On-site) | Full-Time | Ref: JD-OPS-L1

Role Purpose: Support cloud deployments, assist in CI/CD pipeline maintenance, and monitor system metrics.

Key Responsibilities: Maintain automated build scripts, monitor cloud infrastructure using Prometheus, troubleshoot basic Linux server issues.

Requirements: 0-2 yrs experience, strong Linux administration, Docker basics, familiarity with AWS or GCP services.

DevOps & Infrastructure Engineer L2 | Infrastructure

Dhaka (Hybrid) | Full-Time | Ref: JD-OPS-L2

Role Purpose: Automate deployment workflows, manage cloud container clusters, and enforce security policies.

Key Responsibilities: Provision cloud infrastructure using Terraform, maintain Kubernetes clusters (EKS/GKE), optimize CI/CD pipelines via GitHub Actions/GitLab CI.

Requirements: 2-5 yrs experience in DevOps/SRE, deep knowledge of Docker, Kubernetes, Terraform, AWS networking, and Python/Bash automation.

Lead DevOps & Site Reliability Architect L3/L4 | Infrastructure

Dhaka / Remote | Full-Time | Ref: JD-OPS-L3

Role Purpose: Architect multi-region cloud infrastructures, guarantee 99.99% system availability, and lead DevSecOps security integrations.

Key Responsibilities:

- Architect zero-downtime multi-cloud infrastructure on AWS/GCP with automated failover.
- Implement DevSecOps security pipelines, vulnerability scanning, and compliance frameworks.
- Manage infrastructure budget, cloud spend optimization, and disaster recovery strategies.

Requirements: 6+ yrs DevOps experience, AWS/GCP Professional Architect certification, deep expertise in K8s, Istio, and high-availability design.

7. PRODUCT & DATA ROLE TRACK

Technical Product Manager L2/L3 | Product

Dhaka (Hybrid) | Full-Time | Ref: JD-PRD-001

Role Purpose: Drive product strategy, manage engineering backlogs, and convert client expectations into technical roadmaps.

Responsibilities: Define user stories and acceptance criteria in Jira; prioritize sprint features based on ROI; run Agile ceremonies.

Requirements: 3-6 yrs experience in tech product management, CS degree or engineering background required.

8. RAG AGENT PROMPTING & GENERATION RULES

When generating a new Job Description based on user request, the RAG agent MUST format the output using the exact structure detailed below.

Mandatory Output Schema for Generated Job Descriptions

1. **Document Title:** [Job Role Title] - [Experience Level] - Chorolin IT LTD

2. **Role Metadata Header:** Role Title | Experience Level (L1-L4) | Location (Dhaka / Hybrid / Remote) | Email Contact: hr@chorolin.com

3. **Company Brief:** Insert standard 2-sentence description of Chorolin IT LTD.

4. **Position Overview:** 2-3 sentence summary aligned with target experience tier (Junior, Mid, Senior, Principal).

5. **Key Responsibilities:** 5 to 8 bullet points tailored specifically to the experience tier and domain.

6. **Required Skills & Qualifications:** Grouped under *Must-Have Requirements* and *Nice-to-Have Skills*.

7. **Standard Benefits Block:** Auto-include: 2x Festival Bonuses, Provident Fund, Health Insurance, Learning Allowance (BDT 35k/yr), and Equipment Allowance.

8. **Application Directive:** Instruct applicant to send CV to hr@chorolin.com with role code in subject line.

Dual Readability & RAG Vector Keying Guidelines

Ensure every section uses clear semantic tags (h2, h3, ul, li) and plain text key-value pairs. Avoid embedding text inside images or unparseable formats so vector databases (ChromaDB, Pinecone, FAISS) can index chunks with 100% fidelity.
